

Pergola® PROGRAM 2012

Larger Retractable Patio & Deck Solutions

Sunair® Awnings is proud to align ourselves with the Pratic® Company with these new Pergola® awning systems. Pergola® is great for Restaurant and residential patio areas. Available in multiple models to best fit your needs and style. Now you can utilize your patio area during fierce mid-day sun and rain. Large spans can be covered by coupling multiple frame pillars together, while the fabric remains in one piece. Multiple frames can also be mounted together with gutters to reach even larger widths. Roll down screens with mesh or clear windows can be added for extra weather protection. Other models are available than what are listed below, please inquire.
